

 Giorgio Technology Sales/Service	The <u>Slice</u> in Wafer Dicing Technology
May 2011 Quarterly Edition Newsletter  Call us at: <b>(480) 917-3640</b>	Visit our website: <b><a href="http://www.gtsaz.com">www.gtsaz.com</a></b>  Email us at: <b><a href="mailto:gtsaz@aol.com">gtsaz@aol.com</a></b>

Welcome to the second 2011 quarterly *GTS Slice* newsletter. In this issue we are very excited to present to you our inventory of dicing saws. Each tool listed has a brief description and a link that will bring you to the detailed view on our [www.gtsaz.com](http://www.gtsaz.com) web site.

GTS is a master in the refurbishment of dicing equipment such as dicing saws, wafer grinders and the supporting tools used in the dicing process. GTS restores equipment to the original equipment manufactures (OEM) specified condition for optimum performance. GTS is able to help customers match their dicing saw needs to the proper equipment.

The knowledge, skill and quality GTS provides has led to Disco Hi-Tec America granting GTS the only contract in North America to service their direct customers on any of the Legacy Disco Dicing Saws. Our availability to provide troubleshooting by phone and spare parts in stock separates us from the internet warehouses, brokers and re-sellers.

We also provide consumables used in the dicing process. Please review the items listed below that have just been released for sale. By all means if you don't see what you're looking for, please contact us, as new stock arrives often and we are also able to source equipment through our personal network of high-tech industry partners located around the world. Now is the time to capitalize on satisfying your budget plans for procuring your needed dicing saw.
