

January 2010 Volume 1  
Giorgio Technology  
Sales & Service

## The GTS Technology *Slice* Newsletter For Dicing End-Users

### Event

**The first { All Things Dicing } Seminar  
Presented and Conducted By Air Products & Chemicals  
and Giorgio Technology Sales/Service.**

**On: January 27<sup>th</sup>, 2010 10:00 am – 1:00 pm  
At: Embassy Suites 2885 Lakeside Drive, Santa Clara, CA 95054  
Buffet lunch will be served**

This event will provide the dicing community with the opportunity to learn and openly discuss new products and share best practices used in the dicing world. In the coming year, GTS is planning to take this Seminar across the US. In addition, a NEW forum site ([allthingsdicing.com](http://allthingsdicing.com)) has been created to give end-users a way to talk about problems and give info on how to resolve them.

**AIR PRODUCTS & CHEMICALS** will present their new dicing surfactants which keep saws and sub-straight clean while also reducing chipping and cracking while eliminating E.S.D. If metal oxides and bonding are a concern, this product presentations is a must see.

**GIORGIO TECHNOLOGY SALES/SERVICE** will be presenting and discussing the importance of the right tape for the job. We will also cover the differences between tape types and what should be considered in choosing a tape. Also (GTS) will introduce the ABN Delivery Systems used in mixing and delivering surfactants to the saw.

### Articles In This Issue:

#### Event:

Air Products Chemicals &  
GTS "All Things Dicing"  
Road Show

#### Did you know??

Same day shipping  
available on in stock parts.

#### Who we are!

Leading Supplier of  
Refurbished Disco and K&S  
Dicing Equipment

### Kudos Corner

**"I owe Giorgio  
Technology a big thank  
you! You recently  
helped GSS out big  
time with the quick turn  
around rebuilding the  
part for our dicing saw.**

**We were very  
impressed. Thanks for  
the brilliant work!"**

**L.P. GSS**

**"Got the cards back in  
and it looks like the saw  
is working now! I want to  
thank you guys for the  
fast turnaround on this, it  
is much appreciated."**

**T.F. Advr**

**Giorgio Technology**

**ASAHI** will be presenting on how to identify and choose the right blade for your application needs. Having the wrong blade will cause excessive chipping and cracking. The right blade will increase thru-put and yields.
